THE PREZ SEZ

Well folks here we are in the middle of a world event that is bigger than anything we have ever experienced before. We can beat this virus and get back to a normal life by using common sense and helping one another. Please check on each other by phone and if you're making a trip to the store ask others if you can pick something up for them. We must do the social spacing thing and refrain from shaking hands. Another thought I just had is, be sure to sanitize the gas pump handle and screen or buttons when refueling your Corvair, at a minimum you should have something to clean your hands after refueling all of your vehicles.

The self-isolation procedure is something most of us haven't done much. I'm doing it now and it is hard to do...you get "antsy" and want to go somewhere. I jump in my "Rusty" Corvair and go for a drive, sometimes through local neighborhoods just so people can see something just a "little different" going by their windows. Something like that may just trigger a great memory from their younger years!

The COCA will not hold any events such as meetings or get-togethers that would put any of our members in jeopardy from the Virus. Please stay in touch through our Facebook or website to keep up on what we are doing. This shut down may give many of us some time to "spiffy" up our Corvairs.

Corvair of the Month

Dave Castiaux

Here is my runaround car I call it "Rusty" for a very good reason...

I got this car in a trade for some John Deere lawn and garden tractors. I advertised on a garden tractor site that I wanted to trade tractors for a good Corvair engine. I got a response from a guy in Missouri, he said he could get a motor but it was still in the car. It was a 66 Monza. He brought the car down to me here in Oklahoma and we made the trade.

I didn't look the car over much but I did hook up a temporary gas supply. The Engine ran fine so with Richard Law's help we pull the motor, I resealed it and installed it in my 67 Monza.

Seven years later I came up with a 65 motor condition unknown and installed it in Rusty. Turns out the motor isn't too bad and the car is now a daily driver.

Now why is it called "Rusty" because it is a RUST BUCKET, I have applied so much fiberglass, it could be a boat. I covered the floors, the rear deck and resealed the windshield and rear glass. The front cowl area is all rusted out and I foam filled many areas....yes these are temporary fixes at best... but it still drives down the road!
